My great hobby is painting. It has mostly been watercolor, but I have also tried both oil and acrylic. For thirty years now I have been part of a watercolor group in Stockholm. Through my paintbrush I experience all the colorfulness that nature offers in a new and richer way.

Nature in all its variations is for me the foremost artist and my source of inspiration. I only paint for pleasure and too rarely. That's why SWEA Art is so good!

Inger Klintstam

I started painting for about 10 years ago, when I went for 3 years at the art school "Swedish Academy of Realist Art" (SARA) and learned classical painting. My favorite medium is oil, but I also love to experiment with other materials. My heart is with the classical art, but from there I like to make excursions to other worlds. People in different situations are usually my source of inspiration. To paint is what I need to do!

Photography has always been one of my main interests. Now after ending my professional career I am happy to spend some more time on it. For instance I have taken classes in Fotografi at Fotografiska in Stockholm. The theme for the exhibition is water and I show some photos from the sea at Côte d*Azur.
